

# Official *Goblonia* Errata

updated 6/30/2024

- **Kook playbook sheet**

In the Curse ability, replace the word “person” with “target.”

*The kook character sheet wrongly implies that the Curse ability can only be used on a person. The text of the book on pg. 65 states “...and it doesn’t even have to be a person...” This is correct. The curse ability can target anything, so long as it is in the same proximity of the Kook.*

- **Troll playbook sheet**

The Troll playbook is missing boxes for Figure. Trolls do have Figure, it is just limited by their core ability.

*You should draw in your own boxes, limited by the core ability you choose. If you take Big Dumb Brute, only draw one box. If you take Smarter than the Average Troll, drawn in all four boxes. In this case, you should also cross out the fourth box of Bash.*
